

BASKETBALL NET INSTALLATION MANUAL

PARTS LIST

1. ROUND POST INSTALLATION

- 1** Position the bracket against the round post and set the desired installation height.

- 2** Thread Part 8 metal hose clamp through the bracket slot and wrap it completely around the post.

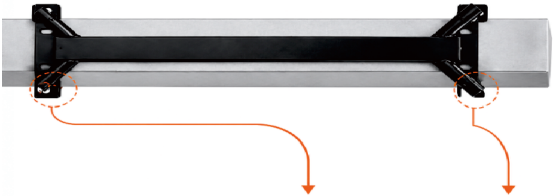

- 3** Use a screwdriver to tighten the clamp clockwise until the bracket is firmly secured and does not slide.

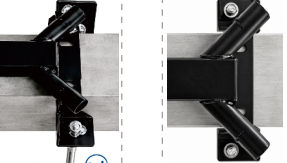

- 4** Install the upper and lower brackets the same way. Keep both brackets vertically aligned.

SQUARE POST INSTALLATION

1 Position the bracket against the square post. Make sure the V-shaped opening faces upward.

2 Insert Part 7 bolts through the mounting holes on both sides and align the bracket with the post.

3 Tighten both nuts evenly with a wrench until the bracket is stable and firmly clamped.

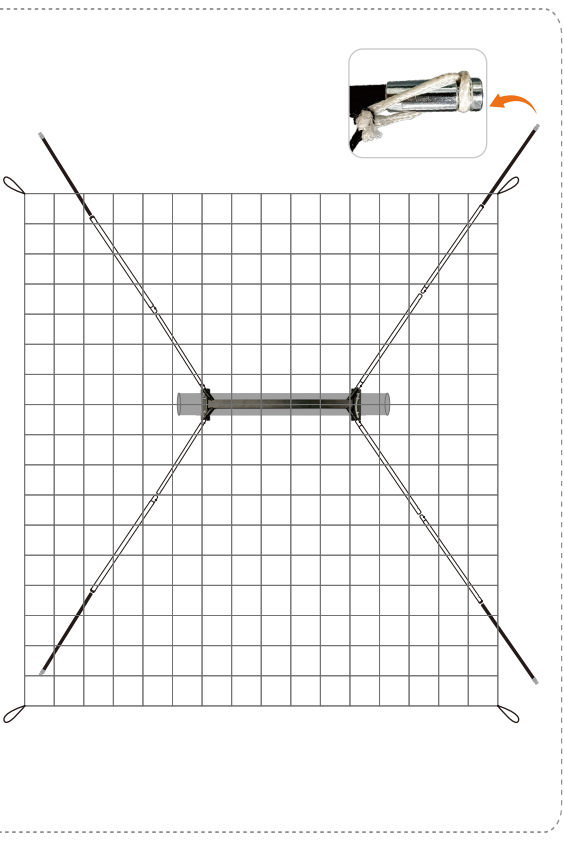

4 Install the upper and lower brackets the same way. Check that both brackets are vertically aligned.

NET ATTACHMENT & FINAL ASSEMBLY

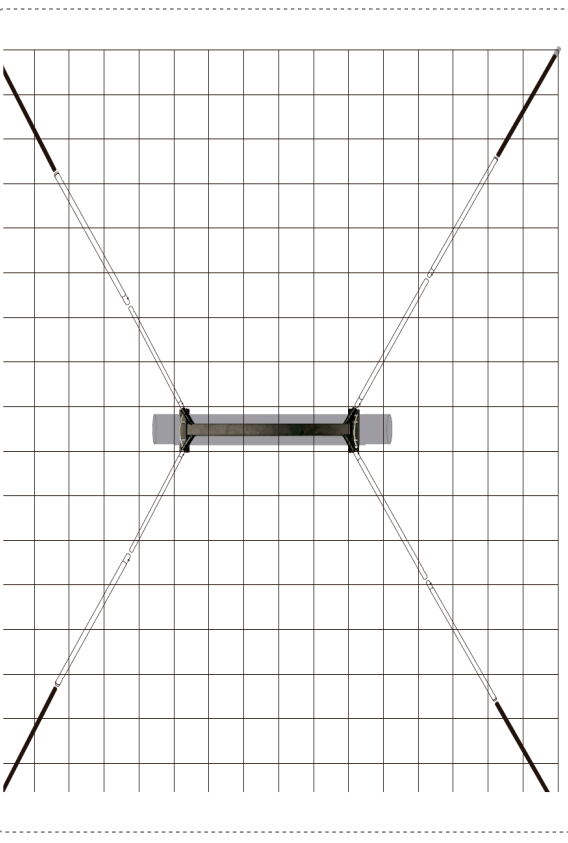

3. ATTACH THE NET

Wrap the four corners of the net around in a circle and then connect them respectively to the corresponding 6th part rods.

4. INSTALLATION COMPLETE

Check that the net is evenly tensioned and all joints are secure.

2. ASSEMBLE THE FRAME AS SHOWN
